

AT&T has already earned \$6.2 billion this year.

So why do we still have to fight to keep our standard of living?

We're the Network at AT&T. We've worked for a lifetime to help make our company the leader in the industry and we're proud of the work we do.

But AT&T still wants to cut benefits and jobs.

We're just asking AT&T for what's fair. We just want to be able to take care of our families.
