Dear Senator/Representative,
"Fast Track" authority for the Trans-Pacific Partnership (TPP) Agreement is a bad deal for all Americans. We can't allow a secretly negotiated agreement among 12 countries encompassing 40% of the world economy to be voted on without review.

As your constituent, I urge you to oppose "Fast Track" and instead focus on ensuring that any trade deal:

- **Creates good jobs and ends the global race to the bottom**
- **Protects the environment**
- **Reignites the American economy and puts our country back on track**
- **Defends the sovereignty of nations against attacks by corporations**

I'm counting on you to fight for these principles. Exercise your constitutional authority and vote against "Fast Track" authority for the TPP.

The Trans-Pacific Partnership (TPP) - often called NAFTA on steroids - is a massive trade deal that is being considered for "Fast Track" authorization in Congress. "Fast Track" authority would prevent Congress from exercising its constitutional authority to review and amend any provision in the agreement. 600 corporate lobbyists get their say - we the people should have ours.

Stopping Fast Track means our voices can be heard.

The TPP could mean:

- **Lost jobs**, by making it easier for corporations to offshore your work.
- **Lower wages and fewer rights**, by speeding up the global race to the bottom since it includes countries with even lower wages and fewer worker rights than China.
- **The erosion of existing environmental protections**, greater pollution from natural gas and other industries, and higher energy prices.
- **Corporate attacks** in private international courts that would gut our consumer, environmental, health, and worker protections as well as eliminate "Buy American" provisions.

We want a fair deal or no deal! Tell Congress: "No Fast Track authority for the TPP!"
