

To whom it may concern,

On behalf of my union I am writing to support the 45,000 Verizon workers who are now on strike to stop the attack on Verizon workers.

Despite record profits, Verizon is refusing to bargain and is demanding that its workers add to those profits from their own pockets.

In the last four years alone, Verizon made more than ***\$19 Billion in profits and compensated their top five executives more than a quarter of a billion dollars***. But apparently that is not enough.

Now you want to outsource more jobs, including sending jobs overseas, slashing sick days, eliminating benefits for workers who get hurt on the job and cutting the healthcare benefits promised to retirees.

Verizon is a highly successful company and it is time that you shared some of that wealth with the people who have made it possible.

Len Cooper

Secretary CWU

Verizon, Stop the attacks, negotiate and settle.

your voice, your union.
